

Requirements and Deadlines for Program Completion

Because of the sequential nature of our courses, students will be expected to complete all courses in a given term before progressing to the next term. All students will complete the program in 27 months, unless there are significant extenuating circumstances (see deceleration policy). All students must complete the PA program within 48 months of their matriculation date. Any student who has not completed all the curricular components of the program within 48 months will be required to withdraw from the program and will not be eligible for re-admission.

Each syllabus in the program must contain learning outcomes to guide student acquisition of required competencies (B1.03). Outcomes and objectives for the clinical rotation courses will be distributed and available online before students enter the clinical year. All didactic courses must be completed prior to entering the clinical phase of the program. All required clinical rotations must be completed before graduation. Specific deadlines and requirements related to each course are located within specific course syllabi and Blackboard sites.
